

HARPOLE DAY NURSERY

Swine Flu Procedure

Our priority at Harpole Day Nursery is to co-operate with the authorities in helping to prevent the spread of Swine Flu (or any other infectious diseases.) See also Sickness Policy.

In the event of a nursery child, staff member or a member of their immediate family becoming ill with Swine Flu, the nursery will work with the Health Protection Agency and Northamptonshire County Council to minimise risk to children and staff.

Parents will be kept up-to-date via letters telephone and/or the website.

The nursery will close if advised to do so by the HPA. We will seek advice from the local authority and the Health Protection Agency regarding re-opening. We will keep parents and staff informed through telephone and our website as the situation progresses.
